Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, the phrase "substantially comprised" is in the past tense. The Examiner suggests using the phrase --further comprises-- in its place.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Puri (US Patent 5,879,727).

Puri discloses a nozzle having a thermally conductive nozzle body 40, a nozzle tip 52 having a hub (which forms an extension) with a diameter less than the diameter of the nozzle body and a web/fin 76 placed around the hub to block heat flow and provide a material gap.

Claims 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The above claims define over the prior art since the prior art fails to disclose or suggest a tubular extension as set forth in the claims.
